

Dear World Leaders,

Urgency arises as AI dramatically reshapes our existence. The future of our generation is more profoundly impacted than any other. We, the students of Institut auf dem Rosenberg, urge you to promptly regulate AI through an international treaty and regulatory agency. The Rosenberg AI Charter serves as the seed for a global accord, guiding AI toward benevolence for the greater good of all mankind.

ARTICLE III

REGULATE DEEPAKES

I.

Mandatory watermarks or detectable patterns are recommended for all deepfake or artificially created content.

II.

We advocate increased investment in deepfake detection technologies.

III.

Unethical deepfake actions, including defamation and identity theft, must be unequivocally prosecutable offenses.

IV.

AI systems shall rigorously maintain accessible interaction histories, with AI software manufacturers being legally accountable for verifying the origin of disseminated information.

Visit www.instrosenberg.ch/charter
to see the complete charter and our story.

Sincerely,
the Students of Institut auf dem Rosenberg.
